### My Learning Journey in Digital Literacy

I am currently building a strong foundation in digital literacy as part of my academic learning. Through this journey, I have gained basic knowledge of computer operations, internet usage, online safety, and digital tools that support learning and communication.

I am learning how to use digital platforms responsibly, improve my technical skills, and adapt to new technologies. This experience is helping me become more confident, informed, and prepared for future academic and professional opportunities.

Grateful for the learning process and excited to continue improving my digital skills.
